Dear Marvel Fans,

I am glad to inform you all, that from today; we will have a dedicated Android app to view our favorite Marvel videos, marvel comics, trailers, talks, reviews and everything related to Marvel. It's purely Marvel Madness, isn't it!

You can scroll through videos, share the app with your friends.

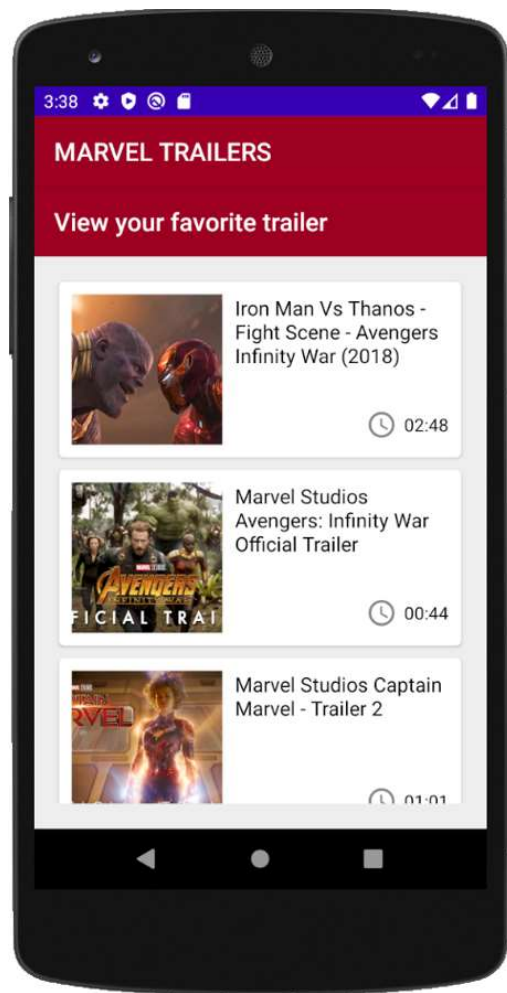

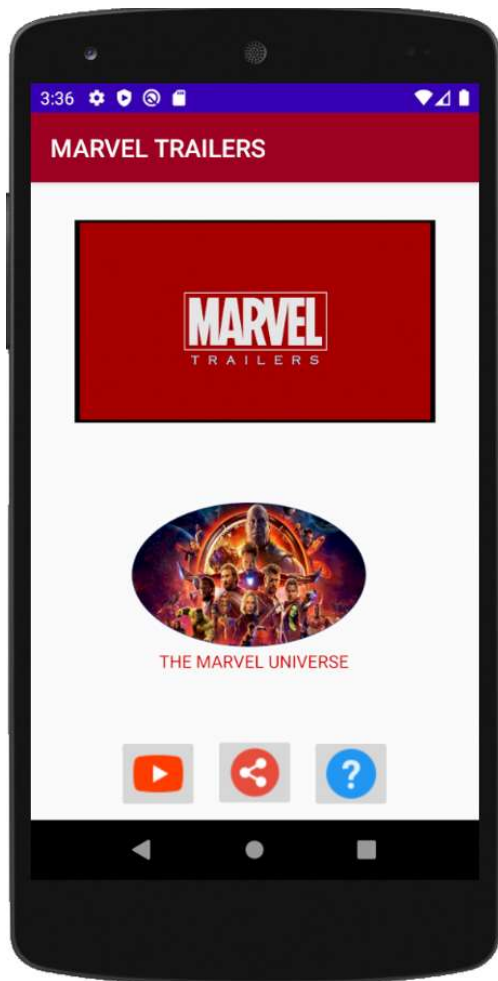

You can also reach out to Admin, command him to host your Marvel favorite video, and your command will be executed at priority.

This app is for the Marvel fans, and you control its universe and not Thanos. Yes, you heard it, you control the content of this app.
